First sentence. Second sentence. Third sentence. Fourth sentence.

```
# A tibble: 5 x 1
  degree
  <chr>
1 High school
2 Associate/junior college
3 Bachelor's
4 Less than high school
5 Graduate

# A tibble: 6 x 3
# Groups:   year [2]
   year degree                      n
  <dbl> <chr>                   <int>
1  1998 Associate/junior college  209
2  1998 Bachelor's                478
3  1998 Graduate                  205
4  1998 High school              1500
5  1998 Less than high school     430
6  2000 Associate/junior college  206
```

```r
